DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

   I. Claims 1-11, 21-23, 33-38 and 44 are, drawn to an apparatus for proportioning foam concentrate, classified in class 169, subclass 15.

   II. Claim 19 is, drawn to an automatic pressure regulating self-educting foam/fog nozzle, classified in class 239, subclass 410.

   III. Claims 12-18, 24-32 and 39-43 are, drawn to a method for proportioning foam concentrate, classified in class 169, subclass 44.

   IV. Claim 20 is, drawn to a method for automatically regulating a self-educting foam/fog nozzle, classified in class 239, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, III and II, IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Inventions I and III do not require the nozzle of Inventions II and IV. The subcombination has separate utility such as a garden sprayer.

3. Inventions III, IV and I, II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another materially different process such as spraying water and fertilizer.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention: Species A, figures 2A-2C; Species B, figure 2D; Species C, figures 3A and 3B; Species D, figures 3C and 3E; Species E, figure 3D; Species F, figure 4C; Species G, figure 4D; Species H, figure 5A; Species I, figure 5B; Species J, figure 5C; Species K, figure 6; Species L, figure 7; Species M, figure 8; Species N, figure 9; Species O, figure 10A; Species P, figure 10B; Species Q, figure 11A; Species R, figure 11B; Species S, figure 11C; Species T, figures 11D-11E; Species U, figures 11F-11G; Species V, figure 11H.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (703) 308-8336. The examiner can normally be reached on Monday - Thursday, 6:30 AM - 5:00 PM.
